One Nation, Two Cultures

The Dominion of Canada is a great heritage. It has many great problems to solve in order to achieve its destiny. Before Governments and people can successfully cope with these problems the citizenship of the Dominion must become imbued with, fully accept, and earnestly practice the "Spirit of Confederation" which animated the leaders in the public life of this country sixty odd years ago. The names and memories of the Fathers of Confederation are held in honor, not only for what they achieved, but because of the true patriotism expressed through real sacrifice by which union became an accomplished fact.

It is no light matter to speak of the Spirit of Confederation. It was a very real thing. It breathes through every utterance of the men who found it necessary to sink political differences, submerge personal views and convictions, abandon policies dear to their hearts, and accept compromises failing short of what they desired. But they did it, knowing that only so could disaster for British and Canadian interests be averted and the assured of the northern half of the continent under the British flag be assured. It was this spirit which alone made Confederation possible and carried it successfully through the stormy early years.

This same spirit is just as vitally necessary in the life of Canada today as it ever was in the past. Without it the Dominion could not have had its being; without it the Dominion cannot continue to exist.

The great challenge which Canada presents to the world at large, and, of course, most vitally of all to her own people, is not in the material realm of trade and commerce, but in the spirit of the people of the Dominion composed as they are of two great races, two distinct forms of religion, speaking two languages, and the product of two cultures. Canada's challenge to the world is to be found in our success or failure to consistently live up to the Spirit of Confederation and make it a living vitality in the life of the Dominion. This is Canada's challenge to the world because the issues of world peace or war are wrapped up in the solution or exactly similar problems in the nations of Europe and across the Pacific.

The problem before the Fathers of Confederation was whether the existence of two races, two languages, two cultures in Canada was an insurmountable obstacle to the creation of a single united nation, and whether such a nation could exist on the basis of that fact. Their decision was that such a nation could exist, and they laid down the formula in the British North America Act. Confederation became an accomplished fact, and it has not only survived but progressed and grown to an amazing extent.

There is one Canadian of French race and language for every two Canadians of English race and language. How shall both feel that common love for home and soil which is the soul of nationality? Both races have traditions, a past of their own. On what principle and to what ends may both races have a common national future?

These vital questions cut clean through the whole of our national life today, just as they did prior to and at the time of Confederation. Shall the people of Canada, with so vast an estate to develop in common, with so great a part to play in elevating the quality of living, and so noble an opportunity awaiting them alike in the British Empire and in the sphere of international relations, always be faced with the menace of racial discord, of attacks by one race on the integrity of the other, of recourse to embittered discussion of rights that should be secure, or wrongs that should have been corrected, when scores of social and economic problems are crying out for solution? Race is like a car left with its engine running. The slightest touch will put it in gear and set it speeding towards some bitter accident.

In the nineteenth century Lord Durham's policy was the "obliteration" of the French-Canadian. The policy of the Fathers of Confederation was the recognition of the identity of both races, both languages, both religions, both cultures. Their ideal was one nation, two cultures; one nationality, two languages; one loyalty, two races.

Which policy was practical? To obliterate a whole people, or to form a nationality in which the identity of two peoples might be secure, free, developing? The Fathers of Confederation had the only practical policy, the only policy that would ensure peace, make the progress of Canada possible, and establish a new nationality in British North America.

Hail Insurance Losses

Year 1928 Is Disastrous One For Hail Insurance Companies

The year 1928 was a disastrous one or Canadian hail insurance companies, the loss ratio being 100.39 per cent. of the premiums, according to official figures released here recently. The report covers the years 1926-27 and 28, showing an average ratio for this combined period of 93.37 per cent. Total premiums were \$17,631,093, while the total claims reached \$16,451,542.

Explorer: "Just to show you the advance of civilization—in the past the Eskimos used to eat candles for dessert."

Old Lady—"And now, I suppose they eat electric light bulbs?"

Guard Against FLU—Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

Shorter Distance To Europe

H.B. Route Will Effect Big Saving In Distance On Grain Shipments

The world is being made smaller not only by automobiles and aeroplanes but by shorter routes between its chief centres. A table of distances recently compiled shows that the Hudson Bay route will effectively shorten the distance between the grain fields of Western Canada and the markets of Europe. For example, from Saskatoon to Liverpool via the Great Lakes and the St. Lawrence is 4,878 miles, but from Saskatoon to Liverpool via the Hudson Bay Railway and Churchill, will be 3,783 miles, a saving of 1,095 miles. From Edmonton to Liverpool via the St. Lawrence is 5,224 miles but via the Hudson Bay route will be 4,182 miles, a saving of 1,042 miles. The Hudson Bay Railway, now being built by the Canadian Government to Fort Churchill on Hudson's Bay therefore promises to be an important factor in reducing distances from the Canadian prairies to the markets of the world.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

Can See Two Oceans

The inhabitants of Costa Rica say that the only place commanding a view of the Atlantic and Pacific ocean is the summit of Mount Irazu, situated in Cartago Province. The mountain is 12,600 feet high, and the Costa Ricans assert that on a clear day it is not difficult to see the waters of both oceans with the naked eye.

DO YOU SUFFER FROM RHEUMATISM

For Relief You Must Reach the Root Of the Trouble In the Blood

Sufferers from rheumatism who have found their condition unrelieved or actually growing worse while using other remedies, would do well to try Dr. Williams' Pink Pills. The tonic treatment with this medicine has proved in thousands of cases that it builds up the blood to a point that enables it to cast out the rheumatic poisons through the regular channels, the bowels, kidneys and the skin. When this is done rheumatism is banished and as long as the blood is kept pure and rich there will be no return of the trouble.

That Dr. Williams' Pink Pills do what is claimed for them is proved by the case of Mrs. Etta A. Muma, Sarnia, Ont., who says:—"I was a helpless invalid for a year with inflammatory rheumatism. I had medical treatment and took mineral baths, but with no result. Naturally I felt utterly discouraged, and was suffering greatly. Then one day I read in a local paper of a case similar to mine, in which great praise was given to Dr. Williams' Pink Pills and I decided to give this medicine a trial. It is now with the greatest pleasure I write to tell you that in less than two months after starting the use of Dr. Williams' Pink Pills I was able to get up and walk about as well as ever I did. I can never praise these pills too highly and I hope that in making my experience public it may benefit some other sufferer."

A very useful book "Building Up the Blood," will be sent free on request by The Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50c. a box. Try them today.

Indians Farming In Canada

The total area under field crops on the Indian Reserves in Canada in 1928 according to figures collected by the Dominion Bureau of Statistics in co-operation with the Department of Indian Affairs was 201,287 acres.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

The Right Idea

Uncle Ezra: "My nephew, the aviation student, writes me as how he did his first 'solo' in Wednesday. He was 2,000 feet in the air."

Uncle Benn: "Well, if a fellow is going to practice singing, that's the place for him to do it!"

The Pennsylvania Hospital, Philadelphia, operates under a charter originally granted to it by George II, of England, in 1751.

The onion first came from India. The onion was almost an object of worship with the ancient Egyptians.

Minard's Liniment for the Grippe and Flu.

Baby's Colds

Best treated without doing—Just rub on VICKS VAPORUS FOR COLDS OF ALL THE FAMILY

Recipes For This Week

(By Betty Barclay)

BREAD PUDDING DESSERT

1 package lemon julep.
1 pint milk.
4 slices bread.
Butter.
Raisins.

Remove crust from bread, butter lightly and cut in small cubes. Divide the cubed bread among dessert dishes and add a few seeded raisins. Warm the milk to lukewarm—not hot; add the lemon julep. Stir until dissolved; pour over bread. Let stand in a warm place until firm—the chill. Sprinkle with a mixture of sugar and cinnamon before serving.

SCALLOPED DISHES

Pour over layers of well-seasoned meat, fish or vegetable enough medium cream sauce to cover. Sprinkle well with buttered crumbs and bake until brown. When combined with starchy dishes such as potato or macaroni, use thin cream sauce. Medium cream sauce calls for 1 cup milk, 2 tablespoons flour and 2 tablespoons butter. Thin cream sauce calls for 1 cup milk, 1 tablespoon flour and 1 tablespoon butter.

To Asthma Sufferers. Dr. J. L. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own argument—it's own best advertisement. If you suffer from asthma get this tried remedy and find help like thousands of others.

Sure Of Hoover's Support

League of Nations Has Good Friend In U.S. President

What stand will President Hoover take in regard to United States cooperation with the League of Nations? Supporters of the League, while they have practically abandoned any hope that the States will become an active member of the League, feel that in Mr. Hoover they have the strongest support of its policies since the regime of President Wilson.

They base this belief on the fact that in 1919, President Hoover was an urgent advocate of United States entry into the League and that while bound by loyalty to his party to take an opposite point of view he will always remain at heart a strong protagonist of League ideals.

It cannot be said that League supporters felt they had a genuine friend in Mr. Coolidge. Practical ignorance or tepid acquiescence was all that could be expected from the former chief executive. Always he appeared to be dominated by the small town point of view of the narrowest type of American in his dealing with the League and constitutionally he seemed incapable of thinking on an international plane.

While the new president is also bound by party considerations it is believed that by every means in his power he will strive to represent the sullen minority in his country who fervently advocate closer co-operation with the League in maintaining world security.

In one month, last year, 100,000 New York families, involving at the lowest estimate 300,000 people, moved from one apartment to another.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unsoared stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

Neighbor: "What is your son taking at college?"

Dad: "All we can send him."

VITAMINS

Everyone needs them to support growth or to protect the body against germ-infection.

Scott's Emulsion

abundantly rich in vitamins is of great importance in all rundown conditions of the body. Scott's Emulsion builds strength.

Scott & Sons, Toronto, Ont.

Small Suns Compose Stars

Partially Eclipse Each Other Every Twenty-Four Hours

In Castor's solar system there is a star of the ninth magnitude known as C. It is composed of two small suns, each about half as massive as our sun and but little more than half the diameter, though of much greater density. They appear to be dying down into the planetary stage, or burned-out condition, for they shine with reddish light and possess a much lower surface temperature than our sun. This pair of twin worlds in the making are at an average distance apart of 1,700,000 miles, and they appear to revolve round one another at great speed in about twenty hours, partially eclipsing each other every time, as seen from the earth. We do not see the effect of these eclipses until forty-three years after they occur, owing to the great distance (2,730,000 times that of our sun) of this marvellous solar system of Castor.

Big Job For Typemakers

Complete Set Of Chinese Type Will Take Seven Years To Produce

Few will envy a certain Shanghai printing establishment which has been working for three years to make a complete set of type, so that 10,000 Chinese characters (most of China's alphabet) can be printed.

It will exceed by several thousands the number of characters now being used in the printing of the largest of Shanghai's Chinese newspapers.

Since the single symbol, in Chinese, may express a whole idea, an imposing array of type is required by the smallest printing establishment, and the newest alphabet, which will provide each of the 10,000 characters in five sizes, will be a boon.

Each "letter" must be photographed and the impression from the resulting plate tediously tooled by hand. Four more years will be required to complete the work.

A Corrector Of Pulmonary Troubles. — Many testimonial could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial, I believe, is its own advertisement—it is its own best advertisement. If you suffer from asthma get this remedy with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Traffic Is Increasing

Two New Steamers Ordered For Vancouver-Victoria Night Service

To meet increased freight and passenger traffic on the waters of the Pacific coast, two new vessels of the "Princess" type for night service between Vancouver and Victoria have been ordered by the Canadian Pacific, it is announced by Captain C. D. Neroutsos, manager of the British Columbia Coast Steamship service. The two sister ships are to be delivered next year, each having accommodation for 450 passengers.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

While the new president is also bound by party considerations it is believed that by every means in his power he will strive to represent the sullen minority in his country who fervently advocate closer co-operation with the League in maintaining world security.

It is a development of the helicopter, and was invented by Vittorio Isacco, who in 1917 collaborated with Pescara in making five helicopters.

The new machine is designed to ascend and descend vertically and to hover motionless in mid-air.

Sultan's Son A Fiddler

After looking in vain for a rich American girl to marry and restore his shattered fortune, Prince Abdul Kadir, the son of Sultan Abdul Hamid, who today might be sultan of Turkey had not Mustapha Kemal made that country a republic, has sought permission from the minister of labor to join a gypsy orchestra as a violinist.

Breeds Of Geese In Canada

Market geese reared in Canada are principally of four breeds, Toulouse, Embden, African and the Chinese.

Minard's Liniment for Coughs and Colds.

Just so many are doomed to be hit by cars this year. Every time you dodge successfully, you doom somebody else.

DEFIES EXTREMES OF WEATHER!

Always straight, strong, neat and tidy in every extreme of weather! That is why you will see Frost Tight Lock Fence everywhere you travel in Western Canada. Low temperatures and scorching suns have no effect on it. The Tight Lock holds! Frost galvanizing resists rust. Frost Fence guarantees more than a dollar's worth of endurance for every dollar you invest. Investigate Frost Fence now!

Fellowship Honor For Manitoba Professor

Dr. Buller Will Be First F.R.S. In Prairie Provinces

Dr. A. H. Reginald Buller, head of the department of botany, University of Manitoba, has been selected for the fellowship honor by the Royal Society of London, England. He is

Canada's Certificate On Grain Shipments May Be Revised By Privy Council

Winnipeg.—Possibility of Canada's "certificate limit" on grain shipments to foreign buyers being challenged in the Privy Council of England, looks like a certainty.

It is learned here that because of shipments of American grain to Germany during the season just ending, which were finally found to be "seab diseased" and which caused the price of stock to fall, the Privy Council, in its opinion, is in favor of a legal review of the validity of the contract which exists between Canada and the London Corn Exchange, acting as intermediary on grain shipments.

At the facts are now known, it is stated, the government will seek a review of the contract on grain shipments after feeding on this "disease." American barley, a board of arbitration was set up in England under the chairmanship of Sir Ernest E. Exton, before whom the German grain exchanges presented their complaints.

This arbitration board, it is learned, has now completed the taking of evidence and will submit the facts in all probability to the Exton court in order that the contract between the London Corn Exchange and the foreign buyers might be tested.

Great Britain claims that the amount of grain to be shipped will be

reduced to 100 million bushels, which may be granted by Germany to make.

Begium, it is stated, will ask reimbursement of six million bushels for alleged worthless forged German documents which the German buyers have sent to the London Corn Exchange.

France will be credited with the intention of claiming ten billion marks (about \$2,000,000) of an immediate loss of grain which the German buyers have sent to the London Corn Exchange.

France will be credited with the

intention of claiming ten billion marks (about \$2,000,000) of an immediate loss of grain which the German buyers have sent to the London Corn Exchange.

It is learned here that because of

the existence of the certificate, no

arbitration can be held in Canada unless any defect in the grain is ob-

servable upon examination. It is on this basis that the legal representatives of the grain exchanges have taken their case to the

British Board of Arbitration, arguing that the defect in the grain was

shipped from the U.S.A. and not ob-

servable upon examination and that

therefore the certificate, which is tan-

gible in Canada, is not a

warrant of quality, but a certificate

of the quality of the grain.

Should the board of arbitration find this is the fact, it is highly probable that the Canadian government will be compelled to test the grain in Canada.

The organized grain trade of Can-
ada and the wheat trade are in

through their agents, asking that it

be understood, submitted to the

board by the Canadian government

that might become the subject of a suit in Canada, a certificate, is not a warranty of quality.

A DREAD DISEASE

That dread disease,天花 (smallpox), has reared its ugly head once more in the province. Six cases have been reported in one town, all the patients being children. Up to now, no cases have died.

Children are most susceptible to this disease.

The disease is spread from one person to another by the discharge from the nose and mouth of one already infected. Overcrowding in the home and close contact in crowded places, however, contribute greatly to the spread of the disease.

If a child has a fever and vomiting with pain in the neck and stiffness of the neck it should be isolated as far as possible. There is no time to waste in calling a doctor for prompt treatment is essential.

Treatment is effective only if administered early and treatment less effective with each day's delay.

If the physician diagnostic Corcoran (Medical Inspector) is not available, then a man should be sent by himself, one member of the household responsible for his care. The doctor should be sent to the sick room. All money and throat medicines should be caught on old rags placed in a paper bag and buried.

Diapers and clothing are kept separate and linens is disinfected before being taken from the room. Scraps of food should not be burned. The house should be well ventilated and smoke should be covered with a handkerchief when coughing and sneezing. Hands should be washed frequently.

Pambolts on all communicable diseases can be had from the Red Cross Society, 407 Civic Block, Edmonton, Alberta.

LAWS AND CORRUPTION

Resuming upon the tendency toward the regulation of every phase of human conduct by law, a recent speaker quoted an aphorism of Cicero, "The most corrupt nation is one that makes a matter of opinion, but knows heaven is bad enough."

There have never been in all history a people burdened with so many evils as exist at the present time. The most corrupt nation is one that makes a matter of opinion, but knows heaven is bad enough.

Still the reformers are clamoring for new laws, and if it were not for men and no man can foretell. Every new law for the regulation of this and that adds to the battalions of the public critics.

Thoughtful men are beginning to realize the futility of the silence of God by the unwise and negligent. Men hope to stop the orgy of law-making and law-breaking, which threatens our national structure and makes of liberty a mockery.

Again McLAUGHLIN- BUICK leads in fine car sales

Far surpassing any other fine car in total volume of sales!

Winning more than twice as many buyers as any other automobile in or above its price range!

Such is McLaughlin-Buick's phenomenal record. And this same overwhelming buyer-preference has greeted McLaughlin-Buick year after year for more than a decade.

The public knows what it wants. The public definitely settles fine car leadership by selecting McLaughlin-Buick!

ECHOES OF GLEICHEN TWENTY YEARS AGO

Taken from the Call in 1909

Mrs. Ward returned from Calgary last week, where she had been quite ill.

P. Tower's returned yesterday from Lincoln, Neb., with his effects to locate northwest of town.

W. H. Sherry returned to town last week, having come to start out with his survey party.

T. Henderson returned from a three-month's visit to his home in Ontario, accompanied by his bride.

Mrs. H. Harrison returned a week ago from Collingwood, Ont., and went to Calgary on a visit Monday.

Mrs. R. H. Hogg arrived from Winnipeg Monday to join her husband who had and will reside here in future.

Miss C. McArthur returned from the Calgary hospital Saturday, and again went to Calgary on a visit Monday.

Mr. Frank Vigor returned to Rosewood Saturday, having spent a week visiting Mrs. D. Brewton and other friends.

H. R. Budd arrived Thursday with his two sons from Beltrami, Minn., and is settling on his property close to Jim Dafos's farm.

It is stated that there are now twenty-five new buildings under construction in the new town of St. Ethelbert, and that town is enjoying quite a boom.

A. D. Shore and M. Dafos have returned from attending the short course in agriculture at Lacombe, which they spent most beneficially.

The marriage of Mr. Robert Brown to Miss Anna was solemnized by Mr. McLynd on Saturday evening, March 23rd, at Miss Fraser's residence.

W. H. Payne, wife and family arrived last week from Nebraska with their effects and are located on his farm, about 2½ miles west of town. Mr. Allen farmed last season. They have a very large outfit of horses, implements, etc., and will farm on an extensive scale.

R. E. Brown, above, was the last bachelor friend to be married in the reading room of the Bank of Commerce Saturday evening, a few days before the annual presentation of the custom ball. The son of Mr. and Mrs. Brown, a young man, has offered one of his friends before leaving them to come one at a very reasonable figure to the Association.

The 15 round boxing contest between Alf. Daw and Billy Reid to be held Saturday evening at the Auditorium is not now the "talk of the country," although so far no betting is heard of. The men who have the contest in hand have promised that there will be no betting, pure and simple and that it will be carried out on the fastest principles.

The provincial election on Monday provided as great a surprise at least as did the last election. The result was considered, as both Liberals and Conservatives now admit that the result was about as they anticipated. Alf. Riley was elected to the Legislature, Mr. Riley, to learn that his services in the past were so appreciated by the electors, and that he was to be re-elected. Mr. Riley has considerable to console him in the fact that he polled so large a vote against his opponent. E. H. Riley was elected by a majority of 261.

The football team of West Calgary public school boys came down Saturday afternoon and played one of the best matches ever played in this town, to the delight of the good crowd of spectators who witnessed the attraction. The Calgary boys could only bring seven of their players so their teacher was allowed to play with them and Gleichen the same number with their teacher. The Calgary boys winning 2-1, the Gleichen boys the victors. The teams cheered each other most heartily and then repaired to the Peoples Cafe where a dinner was in readiness. Gleichen—Arthur Jones, Jas. McLean, Duncan McLean, Jas. Aitch, Eric Dickenson, Victor Beamer, Alex Buckley and J. Ryan.

SPRING

Grandmother was a wonderful housekeeper in her day and generation. Every spring, up came the carpets; down came the pictures and heavy lambrequins; out went the furniture, and in came soap and water and scrubbing-brush. Soon the floors and woodwork gleamed like new; the carpets were replaced after a beating that sent every particle of dirt swirling away in a cloud of dust; the furniture was cleaned and returned to its accustomed place. Everyone was miserable, including grandmother—but it simply had to be done.

Women are better housekeepers than grandmother was ever or ever could be for they have the modern conveniences to amke them so. They have learned, through advertising, of the many utensils that make housework lighter and do it better. They have learned, through advertising, of better foods and how to prepare and serve them more attractively, the many time and labor saving devices that we have come to regard as every-day necessities.

Because of advertising, women have more time for relaxation and the social amenities. They look younger. They are younger—by years—than grandmother at the same age. Advertising has made that possible.

Read the advertising and stay young

FORD

HERE ARE THE FACTS

READ THEM

Many people buy without investigation of facts and on snap emotional judgment. Every year it is estimated a million car "buyers" change their ideas on their car after they have had it six months. Consider the following facts before purchasing your next car—and then decide for yourself which car offers the most value for the money.

1. Do you know that no car under \$2,000 outside of Ford is putting on Houdaille Double Acting Hydraulic Shock Absorbers as standard equipment?
2. That no car under \$1,500 except Ford has triplex shatterproof windshield glass as standard equipment.
3. That Ford is the only car under Buick with three-quarter floating axle.
4. That Ford is the only car under Buick with Torque tube and Radius drive construction.
5. Ford is the only car under \$1,500 with five-bearing transmission.
6. That the New Ford has 25 roller and ball bearings in its chassis.
7. Ford is the only car under \$1,500 with steel frame, irreversible steering system.
8. That Ford is one of the few cars built today that has five-spoke wire wheels as standard equipment.
9. That Ford is the only car under highest priced cars with silent six-brake, internal expanding all-enclosed system.
10. That wrist pin pistons are machined to order and have full floating type.
11. That aluminum alloy pistons are balanced to an accuracy of two grams. This is the finest balance of any piston in any car regardless of cost.
12. That when car is travelling 50 miles per hour the revolutions per minute of motor is only 2053.
13. That gear ratio of new Ford is 3.7.
14. That the actual road clearance of New Ford is 9½ inches—highest of any American stock car.
15. That New Ford car has proven itself in popularity this past year as one of the finest performing cars ever built—from standpoint of pickup, hill-climbing ability, speed, and riding comfort.
16. That the New Ford car has proven itself beyond any doubt as the most wonderful winter car ever built. It starts easily in cold weather and bucks snow beyond belief—ask the owners.
17. That service and dealer responsibility behind the New Ford is unequalled by that of any other car built.
18. That New Ford holds the road at high speeds better than cars being sold at higher prices.
19. Lastly—that the New Ford stands out supreme in its field—in mechanical design, specifications, equipment, quality, and precision workmanship.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavor is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

WORLD HAPPENINGS BRIEFLY TOLD

The Prince of Wales won nearly all the principal prizes at the fourth annual regatta and sale of Shorthorn bulls at Birmingham.

Admiral Alfred Von Tirpitz, who led the Imperial German navy during the Great War, was 80 years old March 1.

Lord Lovat has returned from the chairmanship of the Overseas Settlement Committee owing to the War. He is now almost completely given up public life.

The Turkish government has paid foreign debts for the first time since the Ottomans lost the total of which is \$42,000,000 and is to be paid within 27 years.

French and British forces, which make up the bulk of the free fighting forces are attempting to organize the greatest war's behalf, to be held in Paris in 1928.

The British treasury has received \$20,000,000 as the sixth installment on the French war debt, and \$725,000 as the seventh installment on the war of India.

In order to enable him to become acquainted with public affairs from the diplomatic angle, Prince George, the King's son, has accepted a temporary duties in the foreign office.

General Sir G. E. G. French, former manager of the Royal Bank in western Canada, and for the last five years connected with a Toronto brokerage firm, died suddenly in that city.

The government of Cuba has formally notified the Canadian government that it accepts the agreement reached in the negotiations of his highness, in regard to the division of the short radio waves on the North American seas.

Conducted by the air by feminine pilots was advanced by Mrs. Louise McPhetridge Thaden, of Los Angeles, California, when she arrived in the United States with her highness for 22 hours, 2 minutes and 12 seconds to establish a new endurance record for women.

Surveying Alberta For Air

Old Time Methods Too Slow Says Highness

The inauguration of a five-year program of air mapping to cover the greater portion of northern Alberta was announced recently by Hon. George H. V. Vasey, Minister of Education.

The northward urge of settlement into the Peace River country and adjacent areas is not great, he said, and he recommended that the old-time methods of ground survey were not rapid enough to place the survey in a position to keep up with the situation in an adequate manner. He had, therefore, concluded arrangements to map this portion of the country by aerial methods, the old method of aerial photography.

For the carrying on of this work special "planes will be required and must be maintained in a form that can be applied to the department of national defence for these uses. As these cannot be obtained at once, it is planned to begin the work in the spring of next year. The aerial work will also require the laying out of roads, which, in the latter case is an essential for the carrying on of the aerial survey in that it provides a road for the photographers.

Dog's Life

Two dogs whose prices ranged from \$10 to \$150 were taken to a recent show in London, in baskets which suggested a beauty parlor. Some had minds to attend them and others to attend to the dogs. The result is that no one may enjoy the benefits of the sun's rays.

The Royal Canadian Golf Association has decided to hold the Canadian Amateur Championships on the Jasper Park Lodge course this year, from August 10 to 24.

Five boxes at all drugstores, and dealers, or mailed direct on request to Mrs. F. M. Miller, 97 Maitland St., Ltd., Toronto, Ont.

"I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes."

Cloves came from the India and China, the name from the Latin word—meaning a nail, to which they have a resemblance.

High in World List

Canadian Banks Among Leaders In Amount Of Deposits

In a table made by the California Bank, Los Angeles, in the interesting field of the Bank of Montreal ranks tenth in amount of deposits in a list of 139 of the largest banks of the United States, Great Britain and British Dominions. The rank of the banks in this list is based on the deposits in dollars to the end of that year.

The five leading banks on the list are located in London, and the next two are located in Canada. The next two are located in Canada. They are the Bank of Montreal, and the Royal Bank of Canada. Down to the 139th name is found the Canadian Bank of Commerce.

The paid up deposits, according to the table, for the largest bank is \$1,500,000,000. The Bank of Montreal has a deposit of \$733,489,775, and the Royal Bank \$703,200,000.

At times the wind makes the barrens like the land or a whip, and at other times like a scorpion, work even though the thermometer is at a respectable level. About 120 miles an hour are considered a normal wind.

Mr. George Smith, who is system in mind to build a shelter on the barrens, has a heavy and bulky goods cannot conveniently be carried. It is necessary, however, that the steel structures be built rapidly for transport for passengers, mail, newspapers, etc.

The tracks are to be built from the railroads, which are to be supplied from a rigid overhead structure at a suitable height above the ground level.

The support will be constructed from the steel structures, which are to be built over existing railways, roads, and houses.

The tracks are kept rigid by the use of a rigid rail being provided between the cars as well as the overhead monorail from which they will be suspended.

The design is such that at high speeds the cars will tend to rise slightly, in the event of the weight of the car being increased, and then reduce the friction due to the weight of the cars on the suspended rail.

It is planned to have a steel monorail to join the steel tracks made in a town completely invisible in six seconds with a smoke cloud 300 feet high and 500 yards square.

Scientists studying the commandos have determined that no one can claim to be immune. From this they have not found out what causes it.

FASHION

This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust measure. Size 38 requires 3 yards of 40-inch material with 1½ yards of 36-inch material.

No. 236—Fashion Simplicity. This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust measure. Size 38 requires 3½ yards of 40-inch material with 5 yards of 32-inch material.

No. 241—An Attractive Style. This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust measure. Size 38 requires 3½ yards of 40-inch material with 5 yards of 32-inch material.

No. 244—Step To Smartness. This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust measure. Size 38 requires 3 yards of 36-inch material.

No. 151—For the Smart Junior. This style is designed in sizes 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust measure. Size 38 requires 3 yards of 36-inch material.

No. 239—Playmate. This style is designed in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust measure. Size 38 requires 3½ yards of 40-inch material with 5 yards of 32-inch material.

No. 245—Step To Smartness. This style is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 inches bust measure. Size 38 requires 3½ yards of 40-inch material with 5 yards of 32-inch material.

CHAPTER XVI.—Continued

Men hurried to do his bidding. When the stretcher bearers leaned to lift the inanimate body, Hoop-la fiercely interferred. "Let him alone," he said savagely. Stooping, he picked up the light form and bore it down the hill to their bed in the rough log shack. Donald forced a few drops of brandy through the dying man's colourless lips. Blakie stirred feebly. His eyes flickered open and he smiled as he recognized Hoop-la.

"Give me your hand," he whispered faintly; "I'm runnin' my last high lead, old pal, I guess. God'll be good to us rough-necks." He gasped painfully. The irregular breathing ceased; his eyes became fixed and glassy; his jaw sagged.

Hoop-la sat motionless, the hand of his dead friend held in his warm clasp. Slowly his head dropped forward and his big frame shuddered with dry racking sobs. Doctor Paul came in hurriedly. In answer to the look of interrogation in Donald's eyes, he shook his head sadly.

Donald and Wilkinson tiptoed softly to the door. They were unashamed of the tears that made furrows down their blackened cheeks. Sick at heart, utterly overcome by this tragedy, Wilkinson sank dejectedly to a seat outside the cabin door and covered his face with his hands.

There came a sudden patter of raindrops that drummed on the roof of the cabin. Wilkinson stood erect with arms stretched wide. "Rain!" he cried. "The merciful rain! Thank heaven!" He stood with face upturned for an interval, enjoying the pattering downpour, then turned to look in the cabin door, a deep and brooding sadness in his bloodshot eyes.

"Donald," he said gently, "the newspaper account of this fire will mention the fact that a logger was killed. A logger!—yes—men like Blakie are the backbone of this country, the salt of the earth. Will people ever learn?" he continued, in a voice vibrant with deep emotion. He pointed to the barkless skeletons of trees blackened and charred and branchless, save for the gibbet-like limbs stuck out from the naked trunks. "Think of it! All this—the sniffling out of a valuable life—a verdant hillside changed to a charnel-house of dead trees and blackened stumps on bare rocks—the loss of thousands of dollars worth of valuable timber—all this caused by the careless dropping of a lighted cigarette!"

CHAPTER XVII.

Donald's announcement that Labor Day would be celebrated at the Lake

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

ceeded on foot down the path, his shoes making no sound on the soft dark earth. As he turned a clump of alders and came in view of the cabin he stopped short, arrested by a sight that evidently elicited his amused interest.

Connie stood outside the door before a small mirror hung on the rough log walls of the house. She was attempting to place her heavy hair in a knot at the top of her head. A page cut from a magazine was tacked to a log near the mirror. She studied the photograph carefully, then returned to the attack with renewed vigour. But she could not get it to suit her. She tried and tried, but the heavy shining coils would elude her slender fingers and fall in a golden cascade over her slight shoulders. Her efforts to reach a satisfactory result brought her to the verge of tears. She stamped her little foot impetuously. At last she got it arranged in a fair semblance to that of the envied actress. The effect was so startling that Donald fairly gasped. The child of the moment was transformed, as if by a fairy's wand, to a woman of wondrous grace and beauty.

Connie perked her head saucily, then half smiled to show her small white teeth; apparently she was pleased with the reflection she saw in the glass. From the clothes-line she took a flour sack that had been split open and washed to be used for drying dishes. Draping this from her waist line, she pinned it securely. Assuming a haughty pose, she walked past the mirror with a sinuous undulating movement. The little artist was so perfect in her mimicry that Donald's lips involuntarily formed the word "Janet." Twice she passed before the tiny mirror with a regal step, her head turning with its characteristic bird-like motion to catch the reflection.

Gradually the queenly pose slipped from her. She stopped abruptly, throwing out her arms with a forlorn gesture. Her golden head fell forward. Two big tears welled from her blue eyes and ran down the small freckled nose. Her small hands plucked convulsively at her faded blue overalls. A sob like a stab pain shook her slender body. One arm came up slowly to cover her tear-wet face as she threw herself face forward on the grass. Her slender shoulders were shaking with such an agony of weeping that Donald's throat felt constricted and his eyes grew suddenly dim.

Her spotted cayuse, grazing nearby, raised his head at the sound of Connie's hysterical sobbing and moved to the small figure of his mistress. With ears bent forward and a look of bewilderment in his soft eyes, he nuzzled her neck with his velvety nose. The sobbing continued, but her brown head came up to pat his head lovingly.

Donald tiptoed softly back to the tent. He stood for some time with his hand on the saddle, his head bowed in deep thought. "Poor little kid," he said gently, then whistling his lively tune, he slowly retraced his steps to the cabin. He entered the clearing just in time to see Connie as she disappeared in the timber across the field. He did not want her to know that he was aware of her flight, so he knocked loudly on the door and shouted her name. A raven croaked derisively from the top of a dead tree. The pony raised his head to eye him silently. Connie's pet deer came around the corner of the barn, a look of gentle questioning in her beautiful big eyes.

Donald rode slowly back to camp. Connie's distress had touched his heart; her heart-breaking sobs were still ringing in his ears. "It is not that Wainwright does not love his daughter," mused Donald. "It must be that he is very poor."

"Don't see how I can help," his thoughts ran on. "One can't very well suggest to a father that he buy clothes for his child."

Andy rang the lunch-bell, and there was a wild but good-natured scramble for the tables.

A long table had been arranged in the big dining-room for the officials and Janet's party to which Donald had invited Mr. Wainwright.

"Did you find Connie?" queried Wainwright.

"No," lied Donald, "I couldn't find her."

Janet's friends were having a merry time. There was laughter, jesting and gay repartee from all sides. Douglas was in his element, his quips and brilliant sallies keeping the diners in a continual uproar.

As Donald glanced around the big table at the laughing faces of the gay party, he tried to visualize Connie dressed as one of these fashionably-clad girls who represented Vancouver's "younger set." The vision he conjured caused him to smile dreamily.

Janet had manoeuvred to secure a seat beside Donald. In spite of all her

artful contrivings, she had been unable to have more than a few words with her father's busy general superintendent since her arrival. She noticed the dreamy smile on his face and wondered what could be the cause.

"You seem rather distraught," she said with an arch smile, her dark eyes fixed on his face. "Aren't you enjoying yourself?"

(To Be Continued.)

New Wireless Marvel

Will Function As Both Radio Telephone and Radio Telegraph

The London Daily Mail says that a new wireless marvel has been perfected at the Marconi Company laboratories which will enable a beam short wave radio station to function as both radio telephone and radio telegraph station.

The Mail says the invention was tested out recently between Bridgewater and Montreal with astounding success. An unidentified engineer named "Mathieu" is credited with having perfected the apparatus for the Marconi Company. Of him, G. G. Kellaway, managing director, says: "He solved all our troubles."

The tests were made in the presence of Sir Basil Blackett, chairman of the new Imperial Communication Company; David Sanoff, of the Radio Corporation of America; Kellaway and others, who talked to Mr. J. H. Thomson, chief engineer of the Canadian Marconi Company; Mr. J. E. MacPherson, vice-president of the Canadian Bell Telephone Company, and others, at the receiving station fifty miles north of Montreal.

While experimenters used the desk telephone of the Bridgewater office, a tape was running on written telegraphed messages at the rate of a hundred words a minute. The secret of the system is said to be in the reception. This is described by Sir Donald, chairman of the Imperial Wireless Company, as a unique combination of efficiency and economy. He says it may be incorporated in all beam stations on the Imperial chain. It will avoid the necessity for erecting new stations for telephonic communications or making additions to existing stations.

The invention took eighteen months to mature, but it now has been brought to the commercial stage. One apparatus has been made for a South African beam station. It is believed that when put into general use it should cheapen telephone conversations.

Hard To Limit Armaments

Nations Must Provide Defences In Their Own Way

In Great Britain, as well as in the United States, there is a growing conviction that attempts to define limitations upon armaments do more harm than good. Each nation in the long run must provide for its own defence in its own way, and any foreign effort to induce it to restrict its defences is hotly resented. No nation can be the judge of another's needs. Possibly the great naval powers will conclude by 1931 that the surest road to peace is to abandon attempts to limit one another's armaments, and to rely upon mutual good faith in renouncing war, while each in its own way provides for its safety.—Washington Post.

Appointed To Railway Board

John A. Stoneman Will Succeed Hon. Frank Oliver

John A. Stoneman, Saskatoon, Sask., has been appointed as a member of the board of railway commissioners, to succeed Hon. Frank Oliver, who recently retired.

Mr. Stoneman is a past president of the United Farmers of Canada and is at present a member of the Royal Grain Commission, appointed by the Saskatchewan Government to inquire into conditions affecting the grain trade.

It is understood that Mr. Stoneman will take over his new duties on the conclusion of the work of the grain commission.

Miss Blusox—I suppose your wife has some definite aim in life.

Mr. Rattlesmith—Yep, me, I'm it. But, thanks be, she doesn't often hit what she aims at.

USE

Minard's Liniment

At the first sign of it, its Healing Qualities are Amazing. THE OLD RELIABLE.

W. N. U. 1778

PIMPLES CAUSED SEVERE ITCHING

On Face, Neck, Hands and Head. Cuticura Healed.

"My skin trouble started with pimples and red blotches that affected my face, neck, hands and head. The pimples were hard, large and red, and festered and scaled over, causing disfigurement. They also caused severe itching and burning, and I could not sleep at night with the pain. The trouble lasted about two months.

"I tried several other remedies which did not give me any relief. I began using Cuticura Soap and Ointment and they helped me after a few applications, and in two weeks I was completely healed." (Signed) Miss Muriel Gibson, Hugget, Alberta.

Use Cuticura to clear your skin.

Soap 25c. Ointment 25 and 50c. Talcum 5c. Sold everywhere. Sample each free. Address Canadian Agent: J. E. Watt Company Limited, Montreal.

Cuticura Shaving Stick 25c.

Infallible Finger Prints

System Used By Scotland Yard Has Been Greatly Improved

The use and importance of finger prints in the detection of crime is emphasized in a book published by Sir Edward Henry, former commissioner of the Metropolitan Police.

The number of identifications made during 1927 was more than 34 times greater than the largest number effected in a year by the old method. This depended on the unchanging measurements of parts of the human frame.

At Scotland Yard the ring finger of each hand is recorded and the slips are divided into 64 sub-groups. A search among 100,000 slips can be completed within five or six minutes, by a practised officer.

He carries in his eye the salient features of the slip he is looking for and can search for it as rapidly as his hand is able to turn over the record slips.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

The General Sherman Big Tree in the Sequoia National Park, California, estimated to be at least four thousand years old, is still producing an annual crop of cones from which fall millions of fertile seeds.

There are 320 foreign consuls and consular agents in Canada with the doyen of all J. M. Owen, the United States consular agent at Annapolis Royal, N.S.

Minard's Liniment prevents Flu.

After all, the tea kettle is a cheerful thing. It can be up to the neck in hot water and still sing.

A telephonic service between Stockholm, Sweden, and Buenos Aires, Argentina—a distance of 8,062 miles—has been inaugurated.

The first book to be written by a native Canadian was written by a woman and published in 1801. Since that time some 600 authors have published books, many of them of world-wide renown.

Use Minard's Liniment for the Flu.

Lemons were used by the Romans to keep moths from their garments and were once considered an excellent poison.

The instruments, which are all of stone, were found in excellent condition, and a fair measure of solar altitude can be made even now. Several museums are bidding against one another for the possession of this old Nordic relic.

EXCESS BAGGAGE ACTORS

SUPERSTITIOUS

Superstitions of the vaudeville stage come in for one of the most interesting episodes in William Haine's star picture, "Excess Baggage" which comes to the Gleichen Community Hall, Saturday March 30.

For example, Neely Edwards, the "hoofer" in the production, never fails to spit on the wings before he starts on the stage to do his act. To fail to do so would result in certain misfortune—or so he believes.

Haines as the slack-rope walker has his own personal superstition that he doesn't dare to do his act unless his wife is waiting at the foot of the rope to watch him doing his "slide for life." Without her he knows he will fall.

Many other old superstitions of the stage are shown in the picture. For example, in most other walks of life a black cat is considered the height of misfortune but when a black cat walks across the stage it is considered the height of good luck.

According to research conducted by Metro-Goldwyn-Mayer before making the picture, no theatre dressing room shown is permitted to have drapes in it. Drapes in dressing rooms are considered very unlucky.

It is also considered unfortunate to whistle in a dressing room. All trunks used by the actors who are supposedly theatrical artists, must be square—a "camel-back" trunk is unlucky.

When a company rehearses, the last word of every act is never spoken until after the premiere performance. It would jinx the show.

An excellent example of actor's beliefs in superstition was afforded in Hollywood while "Excess Baggage" was in course of production.

It seems that a certain Hollywood theatre went into bankruptcy. All the actors knew the reason. There were peacocks painted on the front curtain and it doomed the house to failure until they were removed. Ironically enough the new management did remove them and the house was successful.

Director James Cruze rigidly enforced all these superstitions on his actors, Haines, Josephine Dunn and the rest, during the making of the production.

SHADOWS OF THE NIGHT

Queenstown Community Hall

SATURDAY, MARCH 30th

A reporter and his dog, battling the unseen forces of the underworld to trail a criminal to his lair—and win a girl—this is the basis of one of the most remarkable newspaper stories in a long time, in "Shadows of the Night," Metro-Goldwyn-Mayer's remarkable adventure tale of city life, play at the Queenstown Community Hall, Saturday, March 30.

Town & District

The firemen's annual ball is announced for April 1—this is no Joss.

Tuesday a real taste of spring started in—it had the real dust flavor.

Last Strayed or stolen 15 gallons of gasoline from "Brownie." Kindly return same—no questions asked.

E. J. Anderson, B. Sc., Eyesight Specialist, will be in Gleichen at the Queens Hotel on Tuesday, April 2nd.

Miss Frankton left for England Sunday night to visit relatives and friends and expects to be away for about six months.

John Glamback's 20-year-old story titled "The Terrific Tales of the Trails" has at last reached its last chapter in the decision to complete the Arrowwood-Blackie link.

The Catholic Women's League are holding a whist drive in the Gleichen Community Hall dining room on Wednesday evening, April 3rd, at 8:30, to which all are invited. Admission 50c. including supper.

Mrs. St. Jean, Yvonne and Leo left Sunday afternoon to make their future home in the Peace River country. A good crowd of friends were at the station to see them off and wish them all things good. Yvonne's girl friends presented her with a purse before she left.

Mr. Fred Brey, Piano-tuner and professional musician, well-known in Gleichen, intends to make his headquarters in Bassano and will teach violin and mandolin in Bassano, Gleichen and Brooks.

This will be possible only providing there are enough people interested in these towns. Mr. Brey has a splendid reputation and years of experience in teaching. For appointments concerning piano tuning, lessons, excellent dance music and assistance in concerts please write F. Brey at Bassano.
